Explanation on List of Commodities

(1) The handling charges for the types of cargo detailed in the List of Commodities relate to goods up to five times cbm/1,000 kg . For all types of cargo not mentioned in the List of Commodities, the charges for "General cargo if not specifically mentioned" will apply.	
(2) Break bulk handling	upon request

General Explanations

(1) Legal entities liable to pay

1. A **vessel fee** is required for the use of a quayside cargo handling facility by a seagoing vessel. This is payable by the ship's agent.
2. The cargo handling over the quay is
 - a) payable by the issuer of the receiving note/quay order (HDS = Hafendatensatz) in outward seaborne traffic,
 - b) payable by the recipient of the cargo for inward seaborne traffic.
3. The **storage charge** for goods being discharged is levied from the recipient, for goods being loaded from the issuer of the receiving note/quay (HDS = Hafendatensatz) and in other cases from the customer.
4. Fees for **services not specially mentioned** are payable by relevant customer.
5. If the ship owner/ship's agent of a full container vessel has taken responsibility to pay the handling charges for the loading of containers - as mentioned under handling charges section of this tariff - the additional liability of the issuer of the quay order to pay the handling charges for loading in case of outgoing seaward traffic has a time limit. The issuer of the quay order will only be held liable in addition to the ship owner until the goods have been received by the ship. In all other cases the liabilities to pay the handling charges by the issuer of the quay order, as laid down in this tariff, are not affected by the above mentioned time limit.

(2) Conditions of payment

1. Payment of the dues and expenses occurred by the terminals are due **within six days** of presentation of the invoice.
2. The terminal handling charges requested for **advanced payment**.
3. A surcharge of currently 1.5 per cent (Hafenfonds = port dues) is payable on fees (except storage charges) levied under the quay tariff.

(3) Determination of weights and measurements

Charges are calculated on the basis of weights and measurements given in the accompanying documents or of average weights and average measurements in general use in commerce. For any cargoes weighed and/or measured by the cargo handling terminal, dues are calculated on the basis of the figures obtained.

(4) Material

As per consumption and prices as per list

(5) Charges for cargoes transported, or about to be transported, by rail services

1. Recommended prices do not cover expenses incurred by the terminal, and especially those levied by Deutsche Bahn German Railways.
2. Nor do recommended prices include the dues levied on the handling terminal by German Railway in respect of **railcar positioning**.
3. Provided that the rail companies involved agree, on application the **stationary railcar fee** may be refunded in whole or in part.

(6) Contracts are **based on the General Terms and Conditions for Container Handling** (GTCCH) of the Hamburger Hafen und Logistik Aktiengesellschaft in the relevant valid version.

(7) Service of **HHLA Floating Crane** is not included in the HHLA Quay Tariff. Please find tariff of **HHLA Floating Crane** upon special request.
